

## Lubbock Lodging Analysis April 2015

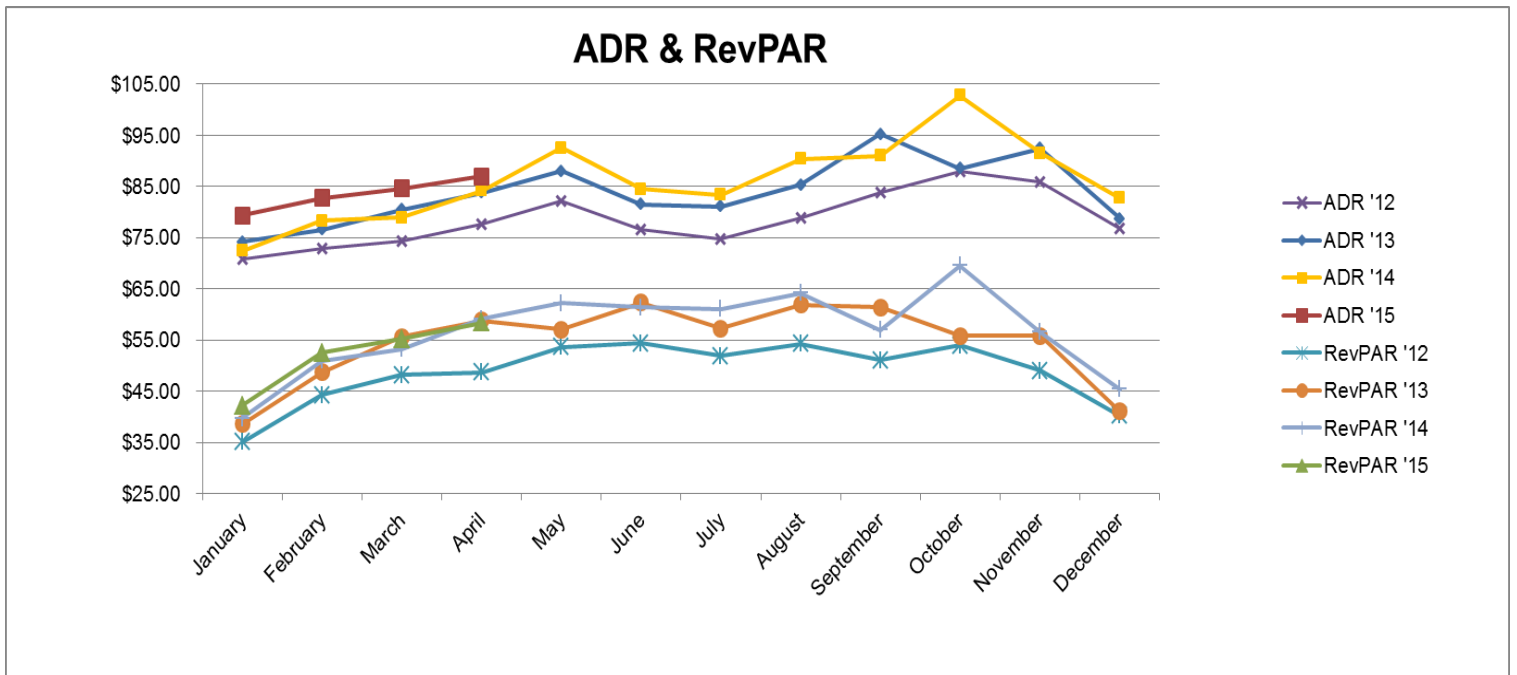

Occupancy for April 2015 decreased 4.5% from April 2014 to 67.1%. Occupancy is calculated as a percentage of the rooms that are available in any given month.

The following chart shows that the Year-to-Date supply of rooms in the market has increased 2.0%. There are currently approximately 320 rooms under construction in Lubbock. Room demand (rooms occupied) decreased 2.5% from room demand for April 2014.

The following chart shows the average daily rate (ADR) and RevPAR (REvenue Per Available Room) for the market. The chart shows that room rates for April 2015 have increased 3.3% from April 2014 to \$86.94. RevPAR for April 2015 decreased 1.4% from April 2014 to \$58.35. ADR has posted an increase 16 of the last 18 months and RevPAR has shown increases for 14 of the past 18 consecutive months. RevPAR is calculated based on total room revenues divided by all of the rooms in the supply which includes rooms left vacant.

The final chart below shows that total lodging revenue has increased 0.6% from April 2014 and is up 4.7% for calendar year 2015. Total revenue has increased for 16 of the last 18 consecutive months. The trend shown in the revenue chart directly corresponds to the ADR and RevPAR increases in the previous charts.
